2. How to Set Correctly

3. Taking a Reading

4. Using the Memory Functions

5. Troubleshooting and Maintenance

6. Technical Data

Important Information

- Read and follow the "Important information regarding Electro Magnetic Compatibility (EMC)" section.
- Disconnect the power plug from the wall outlet when not in use.
- When disconnecting the power plug, do not pull the power cord. Be sure to hold the power plug.
- Do not use the unit for any purpose other than measuring blood pressure.
- Do not use the AC adapter if the unit or the power cord is damaged. Turn off the unit and do not use it if the repair cannot be done by a technician.
- Do not use the unit if the display is not working properly.
- Always consult your doctor. Self-diagnosis of measurement results is not recommended.
- Do not use the unit if the arm cuff is damaged or if it is not wrapped correctly.
- The monitor will not inflate above 299 mmHg.
- The blood pressure can differ between the right arm and the left arm, so it is recommended to use the same arm for each measurement.
- The arm cuff should be at the same level as the heart before taking a measurement.
- To take a measurement, you need to be seated with your feet flat on the floor. Do not smoke, exercise, or drink coffee for at least 30 minutes before taking a measurement.
- The batteries are replaceable. If the display is not working properly, replace the batteries.
- The batteries are not suitable for incineration. Please dispose of the batteries according to your local regulations.
- The batteries are not suitable for incineration. Please dispose of the batteries according to your local regulations.
- The batteries are not suitable for incineration. Please dispose of the batteries according to your local regulations.
